

Logistics Software Development Services

- ✓ Streamlining supply chains to cut operational costs
- ✓ Enabling real-time tracking to build customer loyalty
- ✓ Automating warehouses for flawless accuracy

PAIN POINTS & VALUE PROPOSITION

Common Challenges in Logistics Software We Solve

We solve the industry's most significant pain points with scalable, secure logistics software solutions developed to fit your workflows.

01 Lack of Real-Time Visibility and Control

Without up-to-date tracking, logistics teams struggle to respond to disruptions.
Solution: We implemented a real-time vehicle tracking system that gave dispatchers complete visibility and allowed customers to track in real time.

02 Inefficient Planning and High Operational Costs

Manual route planning wastes time, fuel, and resources.
Solution: Using the TomTom API, we built a route optimization engine that reduced delivery times by 20% and eliminated scheduling chaos.

03 Complex, Opaque Paperwork

Paper-based processes slow everything down and invite costly errors.
Solution: We digitize and automate document workflows for compliance, speed, and error prevention.

04 Fragmented IT Systems

Disconnected TMS, WMS, ERP, and GPS tools lead to duplicated work and poor decisions.
Solution: We create unified logistics software platforms with smart integrations for a cohesive digital ecosystem.

Build smart, scalable logistics platforms

From TMS and WMS to route optimization and real-time tracking – we design logistics systems that fit your unique workflows, scale with your growth, and drive measurable ROI.

REQUEST A CONSULTATION

Who We Build for: Industries We Serve

We don't do off-the-shelf. We build custom software development for logistics that fits your operational DNA.

Explore how leading manufacturers scale with a CMS that works like their business does.

3PLs and Freight Forwarders

We build powerful multi-client logistics platforms with automated workflows and partner integrations.

- Centralized TMS with client, shipment, and billing management
- Client portals for tracking, scheduling, and document access
- ERP/WMS API integration and performance dashboards

E-Commerce & Retail

We create smart logistics software development services for fast, accurate, last-mile fulfillment.

- Real-time delivery tracking and inventory-aware routing
- Buyer behavior forecasting and campaign simulation
- Dynamic warehouse and picking optimization

Manufacturing Companies

We bring automation across inventory, warehouse, and transportation.

- RFID and barcode-enabled WMS
- Fleet scheduling aligned with production schedules
- Analytics dashboards for inventory and distribution oversight

Fleets and Carriers

We unite fleet management and transportation software development in one digital control center.

- Predictive maintenance and load assignment
- Driver certification and monitoring
- Vehicle data integrations for fuel efficiency and safety

Passenger Transportation (Busify, CharterUp)

We craft passenger transit platforms built for scale.

- Real-time vehicle and passenger tracking
- Load-based route assignment and planning
- Dispatcher dashboards and integrated trip scheduling

WHAT SETS US APART?

Core Features and Architecture of Our Transportation Software

Our logistics and transportation software development stack is modular, scalable, and designed for long-term adaptability.

Transportation Management System (TMS)

Lumitech is ready to enrich your software with end-to-end transport management, route planning and optimization, order handling, carrier management, and freight calculation.

Warehouse Management System (WMS)

We successfully work with fleet and warehouse management, vehicle details, maintenance schedules, fuel consumption monitoring, and driver management.

Last-Mile Delivery Module

Lumitech is always ready to create a special module for door-to-door delivery management, dynamic route optimization for couriers, a driver mobile application, and electronic Proof of Delivery (ePOD).

Real-time Fleet Tracking

Our experts can assist you with developing a feature-rich GPS-based real-time vehicle tracking software for easy operational control and visibility.

Customizable Dashboards

With us, your company can get a handy customized dashboard creator with widgets, KPIs, graphs, charts, and maps for easy monitoring of key metrics.

Accounting Systems Integration

Use APIs for easy data exchange of orders and statuses with your most valuable partners and counterparties.

Client & Partner Systems Integration

Use APIs for easy data exchange of orders and statuses with your most valuable partners and counterparties.

Billing & Invoicing Module

Lumitech's solutions allow you to implement computation of service charges from tariffs and actuals with auto-invoicing.

AI-based Forecasting

We are among the leaders in artificial intelligence-based demand forecasting, inventory optimization, and peak load forecasting.

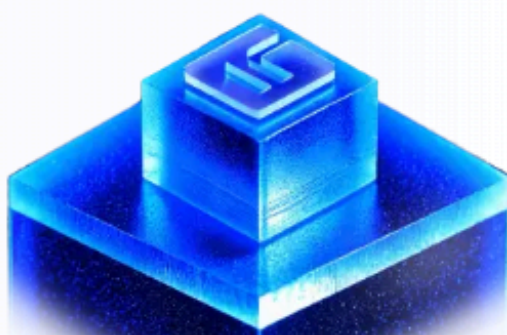

Document Management System

Our skilled developers and managers can help you with creating a central document repository of all transportation and warehouse documents with electronic approval and signature workflows.

Design logistics systems that grow with your business

Custom-built TMS, WMS, route optimization, and real-time tracking – engineered to match your operations, streamline workflows, and deliver clear ROI at scale.

GOOD TO KNOW

Can you integrate logistics software with existing ERP or CRM systems?

Yes, custom logistics software can be readily integrated with your existing ERP, CRM, WMS, or accounting systems. We specialize in creating nimble transportation software solutions that offer smooth data exchange and prevent workflow silos via robust API or EDI integrations.

How much does it cost to develop a transportation management system (TMS)?

Which AI tools are used in transportation and logistics?

Do you offer ongoing logistics software support and maintenance?

What platforms can a transportation application support?

What are the benefits of custom logistics software development over off-the-shelf solutions?

What industries benefit most from transportation and logistics software development?

Why choose Lumitech as your transportation software development company?

Ready to bring your idea into reality?

1. We'll sign an NDA if required, carefully analyze your request and prepare a preliminary estimate.
2. We'll meet virtually or in Dubai to discuss your needs, answer questions, and align on next steps.
