

BARRETT VALUES CENTRE

Revamping Legacy System - The Modernization Journey

Barrett Values Centre (BVC), a global consultancy firm, specializes in cultural and leadership assessments that help organizations align their values and improve performance. With over 5 million survey responses and clients like Volvo and Unilever, BVC's tools are trusted worldwide. However, their legacy system was limiting scalability, automation, and user experience, prompting the need for modernization.

Client Overview

A global regenerative medicine CDMO helps OEM partners design, develop, and manufacture customized biomaterial solutions for specialized surgical needs. The company supports clinical areas including sports medicine and orthopedics, plastic and reconstructive surgery, neuro/spine, and cardiac care. With operations across the U.S., Europe, and New Zealand, it serves life sciences organizations through regulated development and manufacturing programs.

Their work spans biomaterials, biologics, implants, quality, manufacturing, and supply chain operations, supported by cross-functional teams across global facilities.

CHALLENGE

How it was built

Challenge

The platform was not built for scale — manual workflows, limited treatment support, and rigid architecture created operational bottlenecks as the business grew.

Solution

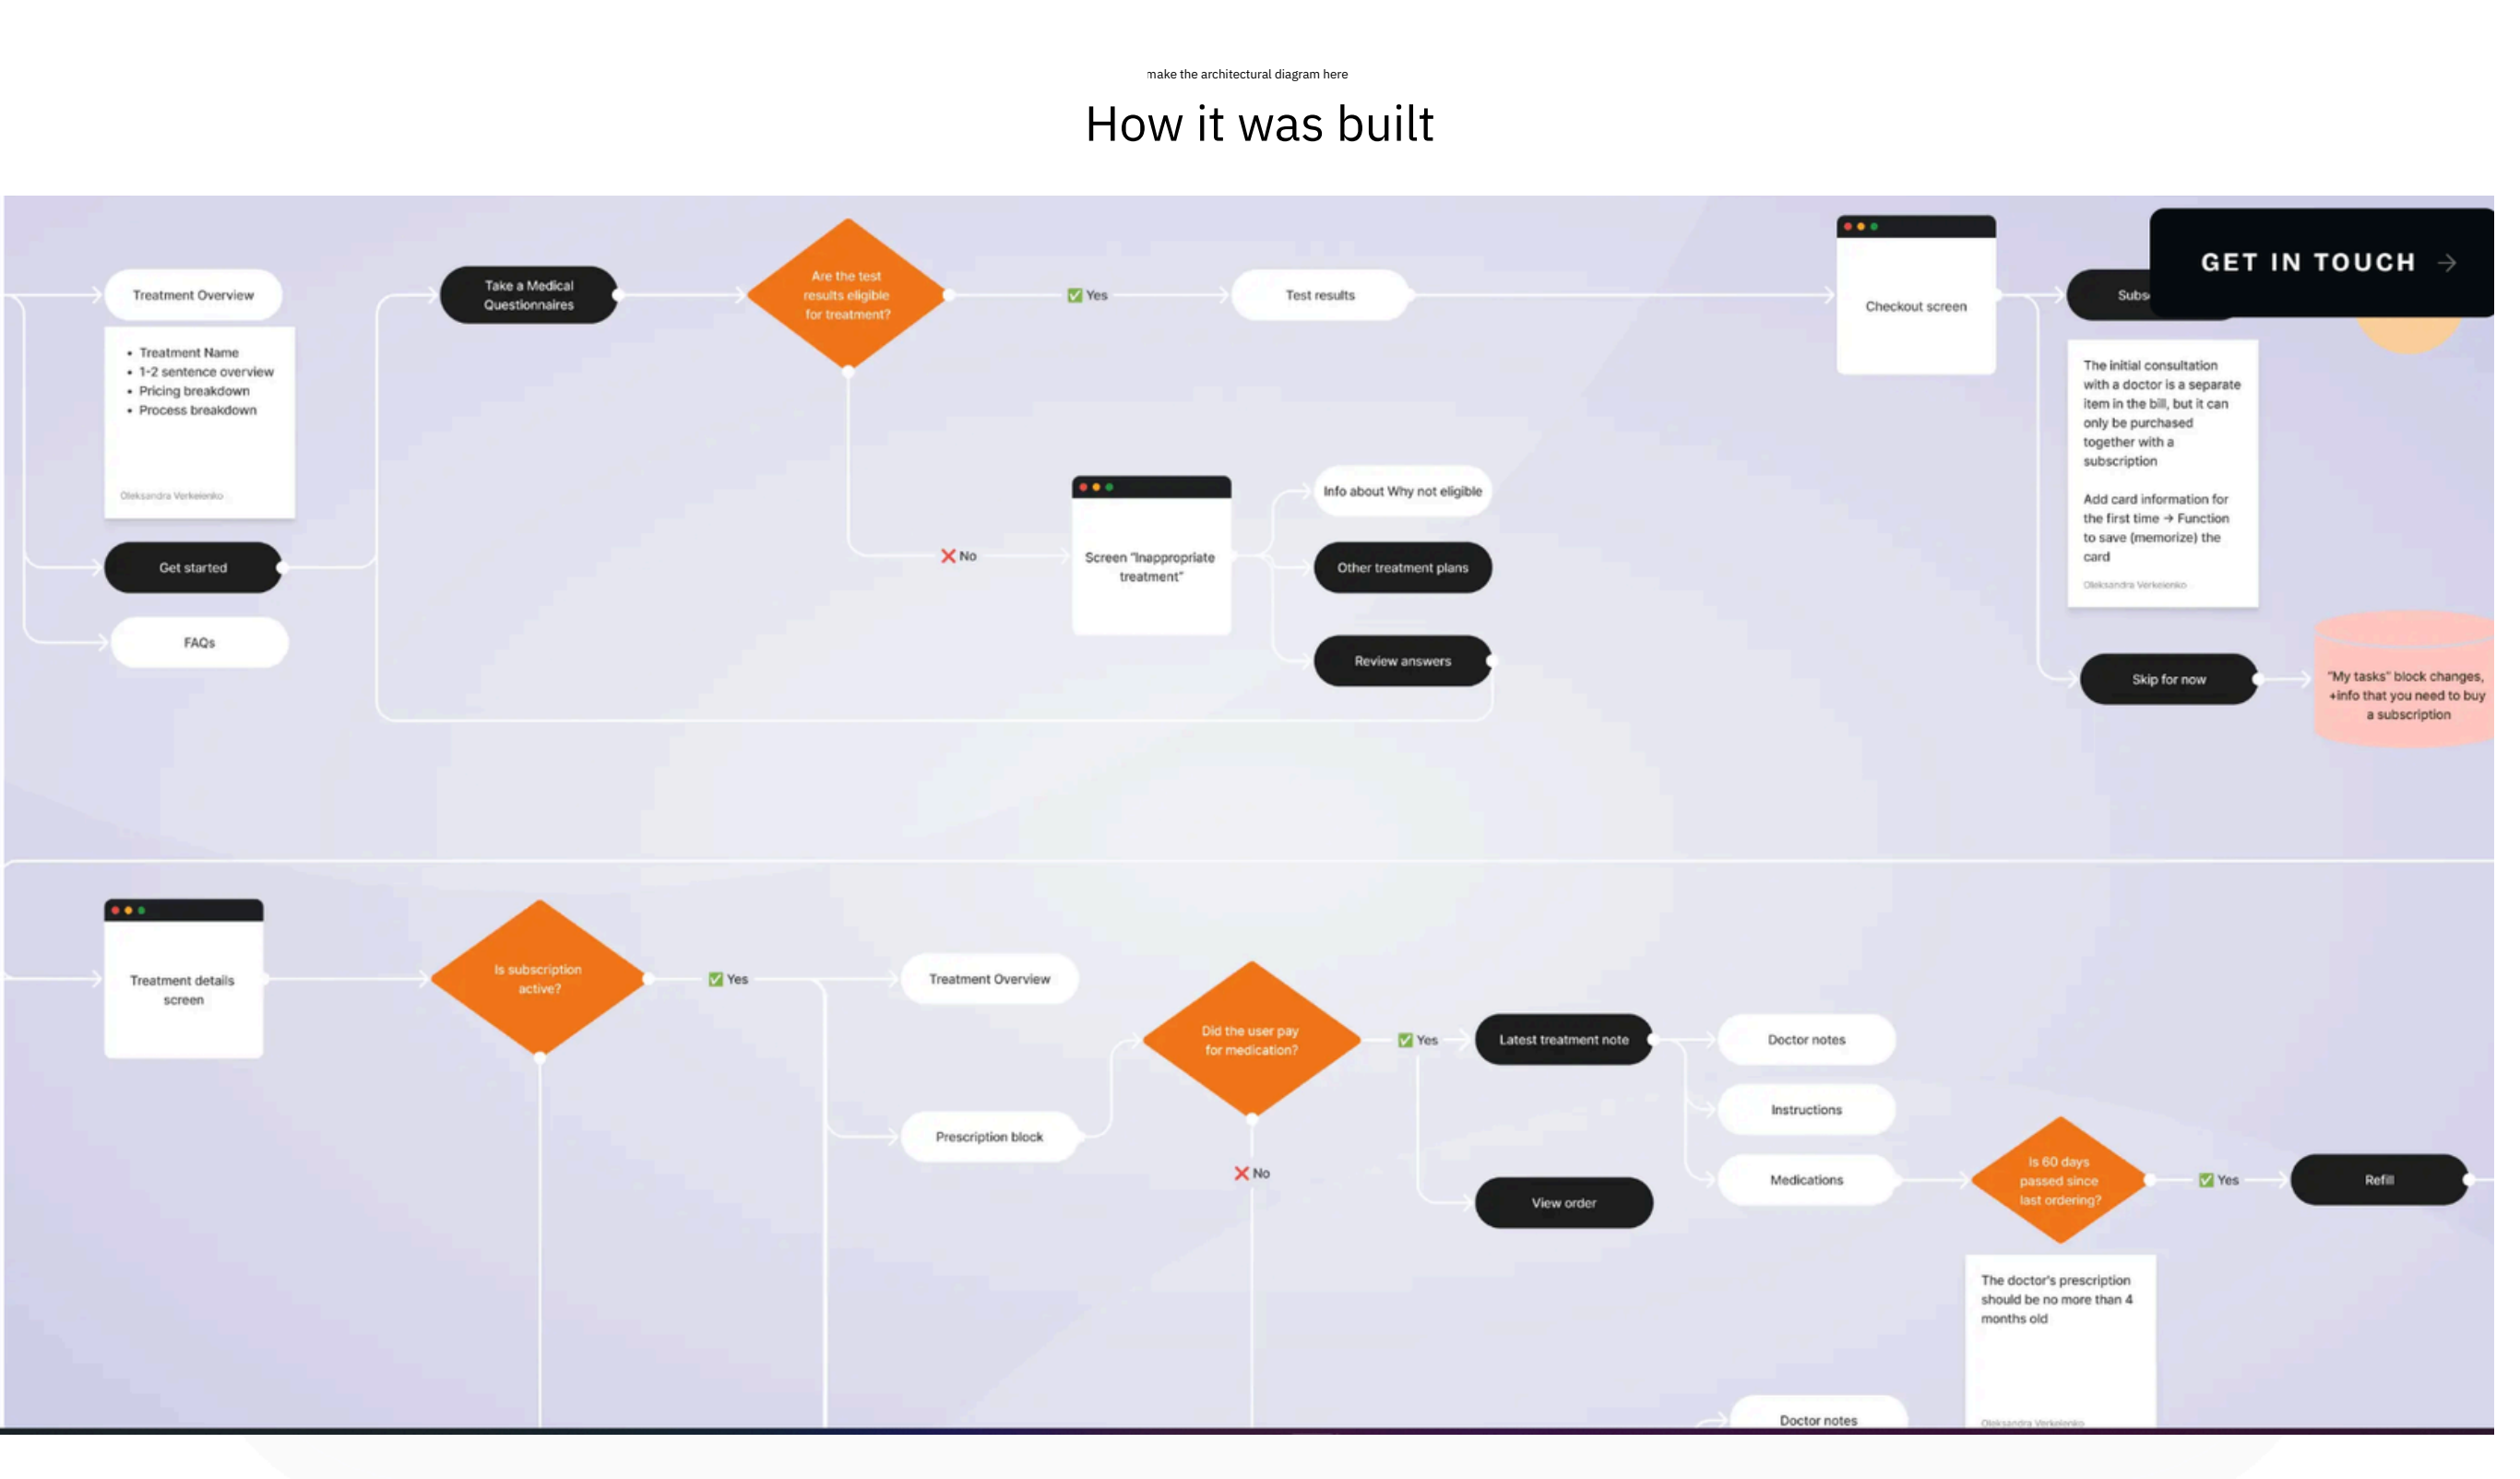

We built the new platform with a self-service patient portal and role-based admin dashboards. The system automates blood tests, medicare validation, e-prescribing, consultations, and follow-ups, connecting patients, doctors, and pharmacies in one scalable workflow.

Challenge

Maintaining uninterrupted patient journeys during migration required aligning legacy data with new system structures while preserving user progress and access.

Solution

We added a dedicated step in the flow that prompts users to update their data and introduced a limited-time discount to encourage completion

Measurable Outcomes

Many companies struggle with managing their workforce travel and organizing accommodations and expenses associated with it. Together with our client, Euristiq co-develops a service that streamlines corporate travel by simplifying lodging booking and managing employee daily expenses.

Over the two years of our ongoing collaboration, the platform's lowest uptime has improved significantly, increasing from 97.49% to 99.69%. Additionally, the number of unique users and hotel searches has tripled, indicating a marked improvement in the platform's performance and user experience.

Results Obtained

✓

Business automation due to a digital solution

We built a high-quality TVOD streaming platform that allowed our customer to digitize the traditional video rental business and offer on-demand video services online. The solution considers all the needs and preferences of the target audience while strengthening the loyalty of the existing ones. The service has **hundreds of thousands of subscribers** in Denmark and is rapidly increasing a solid client base across Sweden, Finland, and Norway

✓

Software maintenance costs reduction by half

The Cleveroad team performed a migration from on-premises infrastructure to the cloud. It allowed the customer to optimize the streaming operations, reach all-time low streaming latency, and scale up business performance while maintaining zero downtime when dealing with rapid user growth. As a result, the number of no-fault-founds was reduced by 8 times, with **software solutions maintenance costs cut by 50%**

✓

Clients attraction/retention rate growth by 20-30%

The company received a high-performing product with cross-platform capabilities. The solution allows the company to broadcast quality video content to multiple users on a pay-per-view basis. The combination of convenient navigation and appealing UX design contributed to an **increased user satisfaction rate several times over**. Within six weeks, 10,000 people subscribed to the service. Blockbuster ensured high-quality delivery for users

Ready to bring your idea into reality?

1. We'll sign an NDA if required, carefully analyze your request and prepare a preliminary estimate.

2. We'll meet virtually or in Dubai to discuss your needs, answer questions, and align on next steps.
